

Quick Reference Sheet

New to Word? Use this guide to learn the basics.

Quick Access Toolbar
Keep favorite commands permanently visible.

Discover contextual commands
Select tables, pictures, or other objects in a document to reveal additional tabs.

Explore the ribbon
See what Word can do by selecting the ribbon tabs and exploring available tools.

Find whatever you need
Look up Word commands, get Help, or search the Web.

Share your work with others
Invite other people to view and edit cloud-based documents.

Navigate with ease
Use the optional, resizable sidebar to manage long or complex documents.

Format with the Mini Toolbar
Select or right-click text and objects to quickly format them in place.

Status bar shortcuts
Select any status bar indicator to navigate your document, view word count statistics, or check your spelling.

Show or hide the ribbon
Select the pin icon to keep the ribbon displayed, or hide it again by selecting the arrow.

Change your view
Select the status bar buttons to switch between view options, or use the zoom slider to magnify the page display to your liking.

Megan Bowen What were previous year's expectations, @Gr... Archie?

Grady Archie Let me review last year's report.

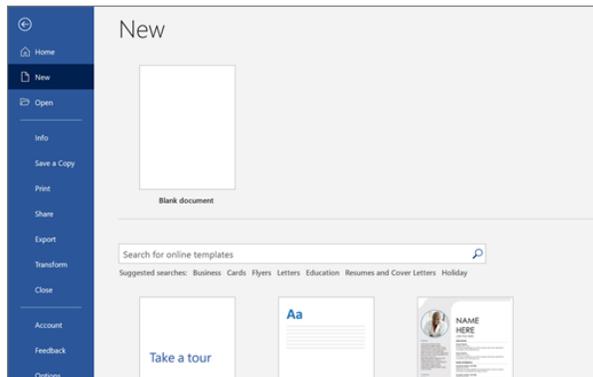

Nestor Wilke amazing. @Emily Braun great work

Megan Bowen Great work, @Emily

Word

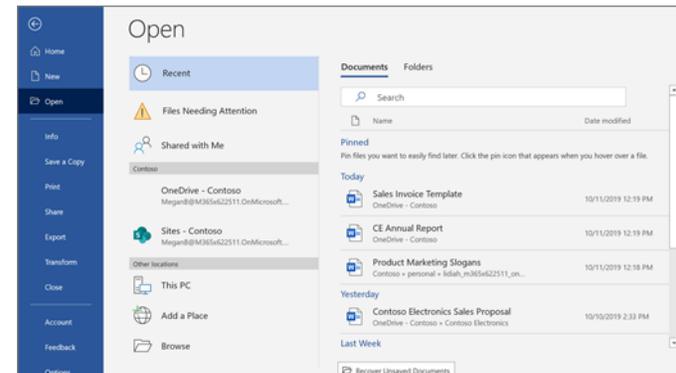

Create something

Begin with a **Blank document** to get right to work. Or start with a template to save yourself time and steps. Just select **File > New**, and then select or search for the template you want.

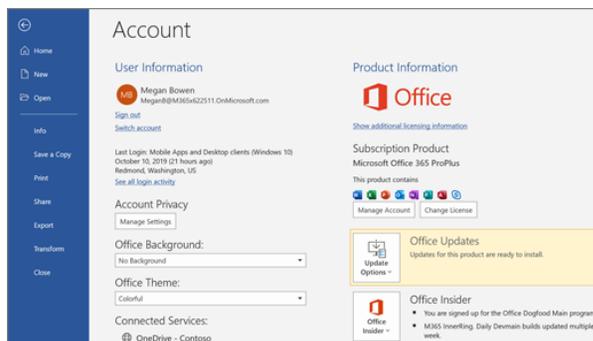

Find recent files

Whether you only work with files stored on your PC's local hard drive or you roam across various cloud services, selecting **File > Open** takes you to your recently used documents and any files that you may have pinned to your list.

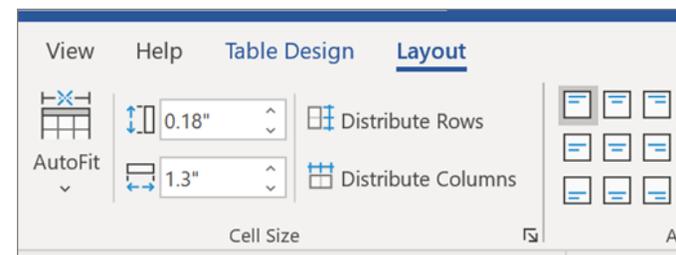

Stay connected

Need to work on the go and across different devices? Click **File > Account** to sign in and access your recently used files anywhere, on any device, through seamless integration between Office, OneDrive, OneDrive for Business, and SharePoint.

Discover contextual tools

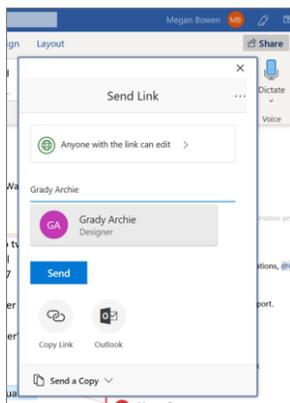

You can make contextual ribbon commands available by selecting relevant objects in your document. For example, selecting within a table displays the **Table Tools** tab, which offers additional options for the **Table Design** and **Layout** of your tables.

Word

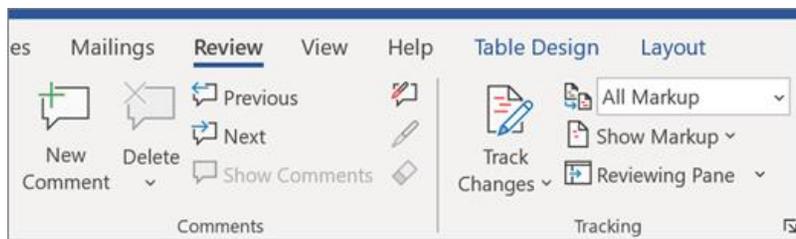

Share your work with others

To invite others to view or edit your documents in the cloud, select the **Share** button in the top right corner of the app window. In the **Share** pane that opens, you can get a sharing link or send invitations to the people you select.

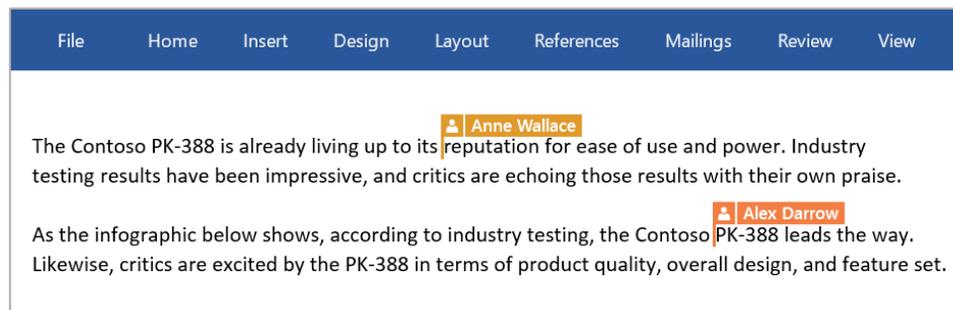

Review and track changes

Whether you just want to check spelling, keep your word count in check, or fully collaborate with other people, the **Review** tab unveils essential commands to track, discuss, and manage all of the changes made to your documents.

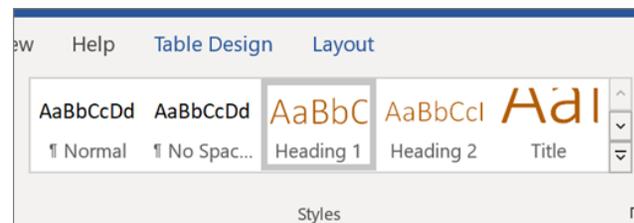

See who else is typing

Co-authoring Word documents that are shared on OneDrive or on a SharePoint site happens in real-time, which means you can easily see where other authors are making changes in the same document that you're currently working in.

Format with styles

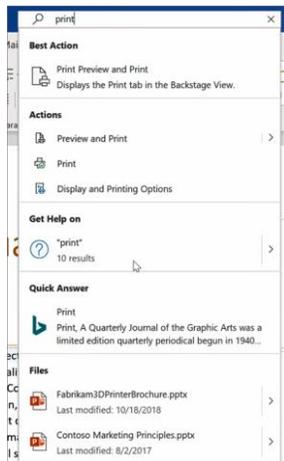

The **Styles** pane lets you visually create, apply, and review the formatting styles in your current document. To open it, select the **Home** tab, and then select the small arrow in the lower right corner of the Styles gallery.

Word

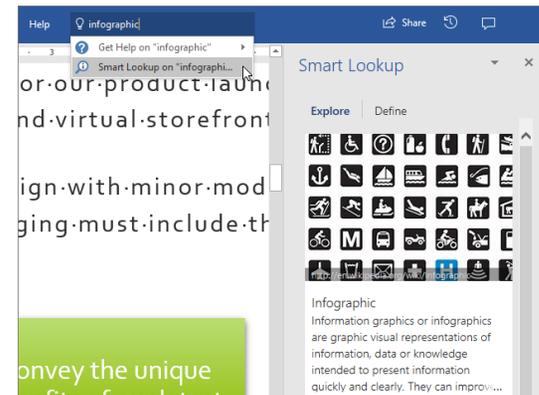

Find whatever you need

Type a keyword or phrase into the **Tell me what you want to do** search box on the ribbon to quickly find the Word features and commands you're looking for, to discover **Help** content, or to get more information online.

Look up relevant information

With **Smart Lookup**, Word searches the Internet for relevant information to define words, phrases, and concepts. Search results shown on the task pane can provide useful context for the data and information in your documents.
